

## **DUF6 RFP Questions & Answers**

### **Q132 – Q136**

- 132.** The answer to Question 1 correctly revises the SF-33, but could DOE please issue a corrected SF-33 (or a Word version of the form so that offerors can correct it)?

**Answer:** A revised version of Form SF33 has been provided with Amendment 002 on August 4, 2009.

- 133.** We are expecting an Amendment 002. Please clarify anticipated timing of its release.

**Answer:** Amendment 002 was issued on August 4, 2009.

- 134.** Regarding DOE's answer to Question 58, is a “cross walk which correlates its WBS to the SOW” [ref: Amend 1 to L.23(a)] still required if we use essentially the same WBS as provided by DOE in the RFP with only minor changes or additions at the lower levels of the WBS and with no intent to change the relationship to Section C, SOW? If the answer is Yes, is this “cross walk” to be part of the “cross reference matrix” in the proposal’s front matter (TOC, list of exhibits, acronym list, cross reference matrix) as required to be included in the first paragraph of L.23? Or, alternatively, is it DOE’s intent that the “cross walk” be separate from the “cross reference matrix” and that the “cross walk” is to be included in the page count?"

**Answer:** A crosswalk is required for the Offerors’ proposed WBS. The cross walk is a separate from the “cross reference matrix” and is to be included in the page count.

- 135.** Will UDS construction trailers be utilized by the new contractor?

**Answer:** That is dependent upon the contractor needs. T1, T2, T3, and T4 at Paducah are Government Owned Property and listed on the GFP list. The current contractor leases all other construction trailers at Portsmouth and Paducah.

- 136.** Question/answer #102 states that Rev 1 of REF DUF6-UDS-PLN-005 is the latest version. However, on the DUF6 website Reference Documents, only Rev 0 is available. Please provide Rev 1 of REF DUF6-UDS-PLN-005.

**Answer:** Revision 0 is the latest version of DUF6-UDS-PLN-005, Waste Management Plan approved by DOE.
